The statistics, tables and graphs contained in this document are based on substantiated principal offences, which have been actively investigated.

While every effort is made to ensure that the information contained in this report is accurate, the BPS makes no warranty, representation or guarantee as to the content, sequence, accuracy, timeliness or completeness of any data or information provided. 1.3 EXPLANATION OF GRAPHS

The graphs used in this report include standard deviation, which has been used as a means of objectively measuring how much the data has varied over time and is useful in identifying extreme highs and lows of crime. Standard deviation has been used so that where the data is above the red line (2 standard deviation above the mean average), it is considered exceptionally high. Where the data is below the blue line (2 standard deviation below the mean average), it is considered exceptionally low. In both cases, it can be referred to as statistically significant (high or low) and is an indication of whether the figures are exceptionally high or exceptionally low.

1.4 AIM

The aim of this report is to produce accurate, timely, objective information that:

- Enables informed decisions to be made on the types of crime that threaten the safety of the community.
- Is used to proactively manage risks to the island and ensure effective policing, redeploying and directing resources at a strategic and tactical level, as required.
- Facilitates effective and open communication with our stakeholders, developing the means to inform them of the plans, efforts and progress being made by the BPS.
- Provides meaningful information as one of the means of reassuring communities in Bermuda.

1.5 SCHEDULE OF REPORTING

Prior to 2016, crime statistics reports were produced every quarter and also included drug seizure information. The 2016 Crime Statistics Report and future reports will be produced once per year. A separate report is scheduled to be produced once per year that will detail drug seizures and drug enforcement.

11. STOP AND SEARCH⁴

11.1 SUMMARY

There were **1,123** stop and searches recorded in 2016. This is shown below in Figure 37, split into quarters:

Figure 37: Stop and Search, By Quarter (Q1 2016 to Q4 2016)

QUARTER	Q1 2016	Q2 2016	Q3 2016	Q4 2016
Stop And Search	183	302	302	336

11.2 TRENDS

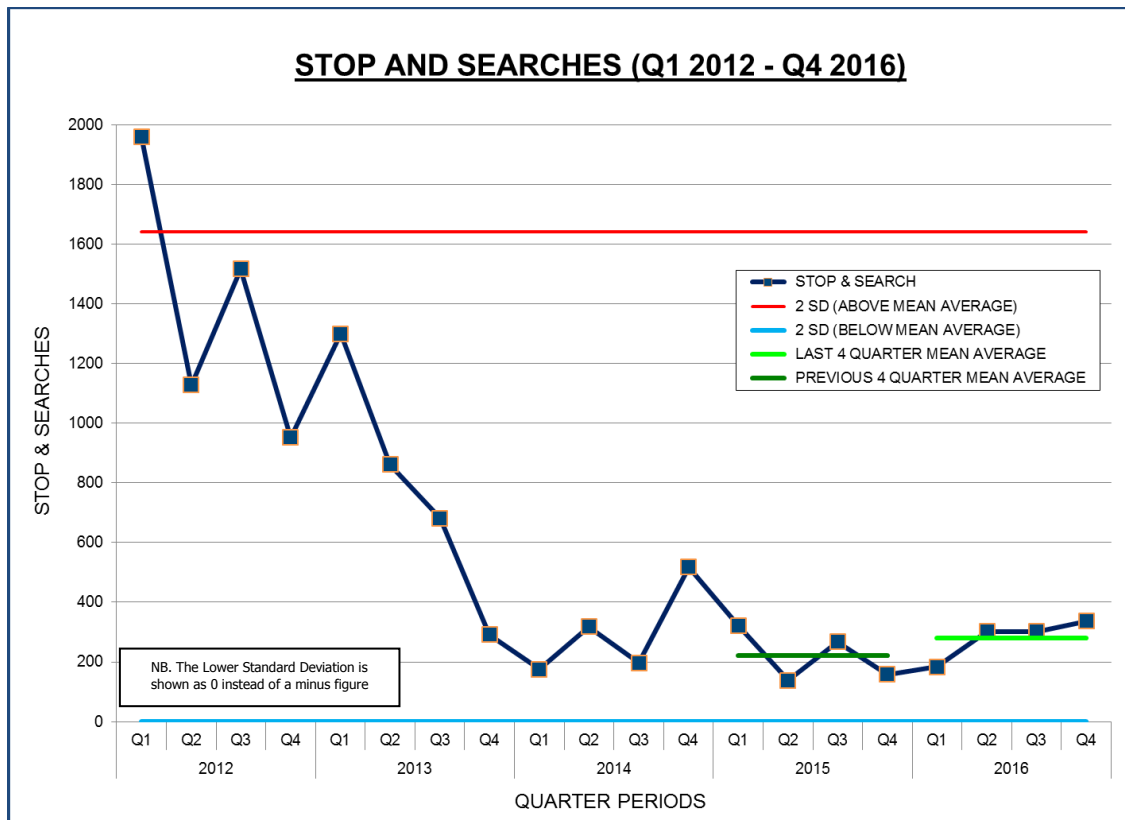

The use of stop and searches has fluctuated since their introduction in 2008, with over **6,000** recorded per quarter at their peak in 2011. As is evident from Figure 35 and Figure 36 (both below), the 2016 quarterly average is less than **300** stop and searches. Stop and search totals by year, for the last 5 years, is shown below in Figure 38:

Figure 38: Stop and Search, By Year (2012 to 2016)

YEAR	2012	2013	2014	2015	2016
Stop And Search	5,555	3,133	1,208	885	1,123

Stop and Searches for the last 5 years, by quarter, is shown below in Figure 39:

Figure 39: Stop and Search, By Quarter (Q1 2012 - Q4 2016)

⁴ Stop and Search are conducted in a proportionate and accountable manner and only when Police Officers have occasion to exercise lawful powers. They are carried out with courtesy, consideration and respect for the individual being stopped. While the figures are not performance indicators, they are a reflection of the frequency of engagement between proactive Police Officers and Prolific Priority Offenders. They provide an indication of police activity, particularly regarding the number of highly visible patrols in the community.
