1.2 DATA INTEGRITY
The statistics, tables and graphs contained in this document are based on substantiated principal offences that occurred during the period covered (not recorded during the period covered), and which have been actively investigated.

While every effort is made to ensure that the information contained in this report is accurate, the BPS makes no warranty, representation or guarantee as to the content, sequence, accuracy, timeliness or completeness of any data or information provided. 1.3 EXPLANATION OF GRAPHS
The graphs used in this report include standard deviation, which has been used as a means of objectively measuring how much the data has varied over time and is useful in identifying extreme highs and lows of crime. Standard deviation has been used so that where the data is above the red line (2 standard deviation above the mean average), it is considered exceptionally high. Where the data is below the blue line (2 standard deviation below the mean average), it is considered exceptionally low. In both cases, it can be referred to as statistically significant (high or low) and is an indication of whether the figures are exceptionally high or exceptionally low.

1.4 AIM
The aim of this report is to produce accurate, timely, objective information that:
- Enables informed decisions to be made on the types of crime that threaten the safety of the community.
- Is used to proactively manage risks to the island and ensure effective policing, redeploying and directing resources at a strategic and tactical level, as required.
- Facilitates effective and open communication with our stakeholders, developing the means to inform them of the plans, efforts and progress being made by the BPS.
- Provides meaningful information as one of the means of reassuring communities in Bermuda.

1.5 SCHEDULE OF REPORTING
Prior to 2016, crime statistics reports were produced every quarter and also included drug seizure information. Since 2016, Crime Statistics are produced once per year. A separate report detailing drug seizures and drug enforcement is also produced once per year.

A **Recovery Of A Firearm and Or Ammunition** is where a firearm, ammunition or imitation firearm is recovered by police.

Parking Tickets issued by a Police Officer and a Reserve Officer (note tickets from Traffic Wardens are not included), and Marine Tickets, which are similar to MVTs except they are used for Marine related offences, are included in the total for MVTs. Traffic Tickets reflect the strategic priority of the BPS in road safety and are a reflection of officer activity. MVT, MAN, Parking and Marine records are only available from Q1 2015.

Figure 27: Calls For Service, By Quarters (Q1 2014 - Q4 2018)

---
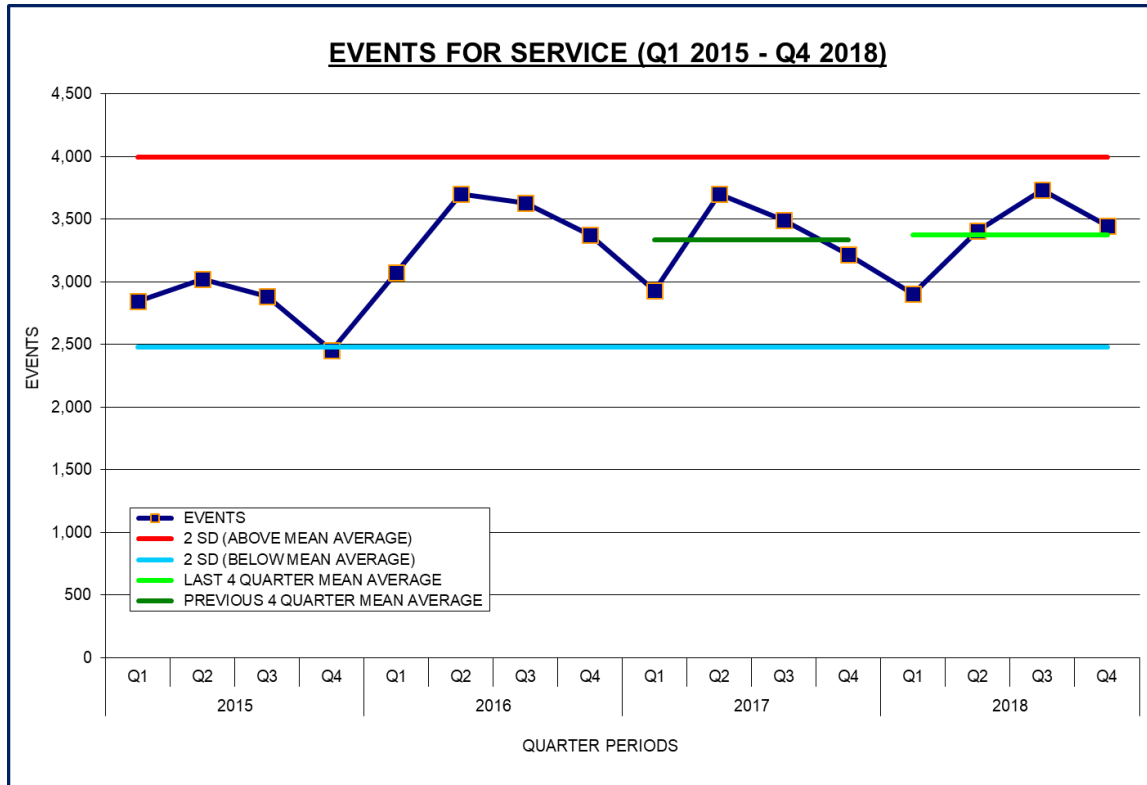

[3] In previous Official Statistics Reports, 911 call data records were used. The change to using Event data is intended to better reflect Police Activity. Events have been used since 2015. Events refer to the number of occasions Police resources have been deployed OR when information has been received from a Police Officer or outside agency, that requires development. In 2018 the 13,495 Events resulted in 1 of 3 subtype records being created, specifically 3,694 Crime Incidents (offences), 1,468 RTCs and 2,468 Non Crime Incidents. Those Events that did not lead to a sub type record being created involved other Police Activity e.g. Road Side Sobriety testing, searching for a missing person, escorting cash to or from banks, planning around a large scale event etc.

[7] Stop and Search are conducted in a proportionate and accountable manner and only when Police Officers have occasion to exercise lawful powers. They are carried out with courtesy, consideration and respect for the individual being stopped. While the figures are not performance indicators, they are a reflection of the frequency of engagement between proactive Police Officers and Prolific Priority Offenders. They provide an indication of police activity, particularly regarding the number of highly visible patrols in the community.
